

How to Record

- Plug one end of the supplied AUX cable into the module and plug the other end into a device with a 3.5mm audio line out (phone, computer, MP3 player etc.)
- Press play on your audio device (phone, computer, MP3 player etc.), then press the small black button located on the front of the module to begin recording. You should hear a single beep to let you know recording has begun.
- Press the small black button again to stop recording. You should hear two beeps to let you know recording has stopped.
- Press the large white button on the front of the module to play back your recording.

How to Erase

- Simply record over the current sound file using the method above to delete it.
