

DVR608

Low Cost DVR Module

Application Note

General

This document is trying to give some ideas when designing the cabinet based on DVR608 module.

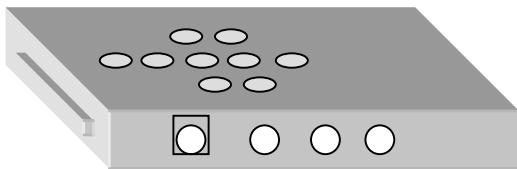

Module Description

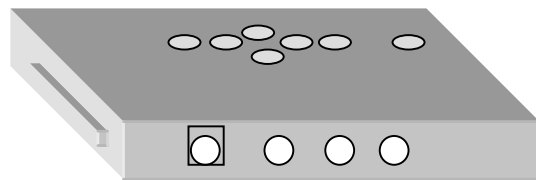

1. the module is measured as 50x92.5mm, with 4 mounting holes of 3mm diameter.
2. the module has tact switches on one side and all connectors on the other side.
3. no. of keys can be designed by customer, from 7 to 9
4. tact switches on the PCB can be deleted and re-arranged on the separate PCB, there is the connector reserved for this purpose.

Cabinet Design

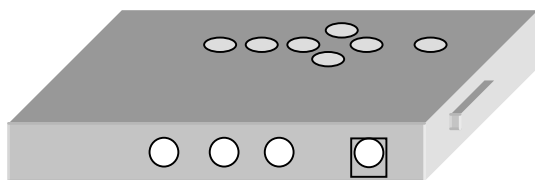

Idea 1: using the module without any change

Idea 2: change the key board location and arrangement

Idea 3: put the module up side down and make another PCB for key switch

Idea 4. Add a IR remote control unit to the cabinet and reduce the no. of keys
